

Dr Stella Irungu.

Biodata:

Dr Stella Irungu is a Senior Research Scientist at the Department of Reproductive Health and Reproductive Biology at The Institute of Primate Research in Nairobi, Kenya. She has experience in the application of proteomic technologies in biomarker discovery for the non-invasive diagnosis of endometriosis. She also has a keen interest stem cell research as an alternative therapeutic method for management of endometriosis and application of multi-omics technologies with the aim of finding better diagnostic markers and to better understand the disease. She is also passionate about raising awareness of endometriosis in Kenya. She is a Commonwealth Scholar and holds a PhD in Biomarker Discovery and Proteomics from University College London (UCL).

Topic:

Discovery of biomarkers for the non-invasive diagnosis of endometriosis
