

Dr. Mbiine Ronald

Biodata:

Dr Mbiine Ronald is a general surgeon and lecturer of surgery at Makerere University College of Health Sciences. He is directly involved in management of gastrointestinal and abdominal surgical conditions at the Mulago National Referral Hospital in Kampala Uganda. Here he participates and supervises the management of various abdominal surgical conditions including cancer, trauma among others conditions.

He has over time developed keen interest in the surgical management of endometriosis and has directly participated in the surgical management of extra-pelvic endometriosis.

Dr. Mbiine is the program lead for the MakGlobal surgery program which is a key advocacy arm aimed at advancing universal access to safe surgical care on the African continent through the establishment and strengthening of essential surgical systems with key emphasis built on surgical education and research.

Dr. Mbiine sits on the National executive council of the Association of Surgeons of Uganda (ASOU) where he is the general secretary. He has also been a member of several scientific committees including the College of Surgeons of East Central and Southern Africa (COSECSA) 2019 conference, 2020 World Health Summit Africa region meeting, Association of Medical Schools in Africa (AMSA) among others. He's major dream is the attainment of universal access to safe surgical care through capacity building in medical education, research and innovation.

Topic of Presentation:

The menstrual umbilicus: A case report and surgical management of umbilical endometriosis.

Outline:

Clinical case discussion for the diagnosis and management of umbilical endometriosis. This is a case presentation of one of the patients that I recently treated and performed surgical excision of the umbilical endometrioma with reconstruction of the umbilicus (navel). The challenges and missed opportunities for early diagnosis and the surgical management and follow up care are discussed.
